Log Homes from Finland

The Natural Choice

GARDEN STUDIOS HOME OFFICES

Quality comes as standard

Welcome to the Finlog Garden Studios/Home Office brochure. The designs on the following pages are examples of the different types of buildings we can build for you. If you would like to design a space just for you, bespoke cabins are our speciality.

All our buildings are built to the highest possible standard with the best quality timber from Northern Finland and Russia at our own factory on the Finnish/Russian border. So you get direct from the factory prices.

Finlog garden studios can be built in round or flat log, thicknesses start from 70mm and go up to 260mm. All Finlog buildings are built using our own fully trained teams. By using only the best timber means Finlog can offer a renewable guarantee (subject to contract).
