TRANSPORTABLE LOG HOMES

*Be it a single unit
or multiple, Finlog
has the solution.*

WELCOME TO FINLOG

08458 12 13 14

FINLOG is a family run business and as such is able to provide valuable personal assistance to our clients from the design stage to the construction. We specialise in providing you with genuine log buildings made in our own factory in Finland, manufacturing our log buildings to the clients individual requirements.

We are proud to introduce you to our range of 88mm log transportable buildings. Built to exceed BS3632 (mobile home regulation). All our buildings are built to the same exacting standard.

Our design brief is quality: the result is a superior 88 mm laminated wall (choice of log sizes) and 7 part roof system, for which we are proud to offer an endless guarantee (subject to contract).

Laminated logs are so much stronger and stable than non-laminated. This concept is carried through even to doors and window frames.

All our timber is sourced from Finland and Russia as a result is very slow grown, strong and stable. This is why with the right maintenance we can offer our endless guarantee.
